

Softball Locker Room Renovation

The softball locker room renovation started Tuesday, November 6, 2018. The renovation will expand the locker room and create a much need open collaborative space. The project will provide all new lockers as well. The North end of the building will receive a new 150 square foot addition to accommodate the relocation of showers needed to expand the locker room. The project is expected to reach substantial completion by February 3, 2019.

NMSU Cyber Infrastructure Architect team presents MATLAB workshops

Jelena Karapetrovic and Edin Sabic, graduate assistants in ICT's Cyber Infrastructure Architect (CIA) team, presented a *Matlab for Beginners Part 1* workshops to approximately 30 people at Hardman Jacobs Undergraduate Learning Center. MATLAB (Matrix Laboratory) is a numerical computing environment used in a number of engineering, science, and economic courses at NMSU. The MATLAB workshop is one way that the CIA bridges the gap between NMSU's researchers and NMSU Information and Communication Technologies unit by assisting with computing and other technology resources offered at the university.
